

Concussion symptoms just not getting better?

We can help put you back on track.

Work with one of the world's top neuroscience experts, Dr. Majid Fotuhi, to boost your memory, focus, and peak brain performance.

NeuroGrow.com

Three Main Categories of Symptoms

Integrated and coordinated care by a team of specialists to treat all the symptoms of concussions is the key factor for our success in helping our patients achieve a meaningful and rapid recovery.

The Concussion Recovery Program

Comprehensive Evaluation

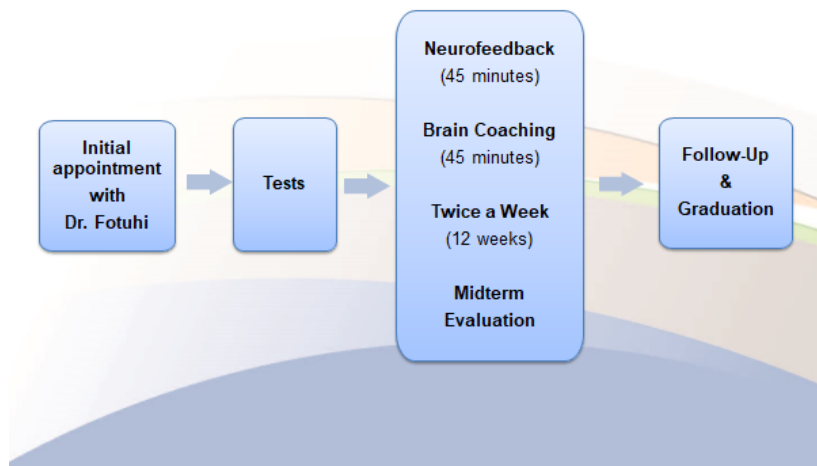

- **Neurological Assessment** by Dr. Fotuhi
- **Neurocognitive Testing** – to establish your brain's strengths and weaknesses
- **Brain-Mapping (Q-EEG)** – to establish a full picture of your brain's pattern of electrical activity

Integrated Treatment

- **Brain Coaching** – to address and treat issues such as fatigue, irritability, anxiety, depression, apathy, difficulty sleeping, or changes in personality
- **Cognitive Skills Training** – to address and treat issues such as memory loss, slowed speed of cognitive processing, attention deficit complaints, and organizational skills
- **Neurofeedback** – to use state-of-the-art EEG-based biofeedback technology to address and treat issues such as insomnia, anxiety, memory loss, migraine symptoms, apathy, or irritability

Dr. Fotuhi will personally ensure that each patient receives the highest quality of care from all members of our multidisciplinary team.

Concussion Recovery Program: Twice Weekly Treatments, 12 Weeks
